- Scrum, Jira
- GIT

Languages

Polish - native

English - upper intermediate (B2)

Wojciech Jezierski

Junior Front-end developer

About me

I'm 23 years old graduate of Computer Science with 6 month of commercial experience. I'm an aspiring front-end developer and creative problem solver with a passion for crafting engaging and user-friendly web interfaces. Proficient in languages like HTML, CSS, and JavaScript, they excel at translating design concepts into responsive and visually appealing websites and applications.

Work Experience

06.2022 - 10.2022

Northvolt Systems Sp. z o.o.

Front-end developer (internship)

- Develop front-end parts of Manufacturing Execution System (MES) in Vue.js library
- Creation of responsive views to be reused in multiple systems
- Displaying data on a chart using the Chart.js library and the Vue.js framework
- Reporting in Jira
- Cooperation in the scrum methodology in an international team

Technologies: Vue.js, Chart.js, JavaScript, Tailwind CSS, HTML, CSS, Jira

05.2021 - 08.2021

SBKY

Front-end developer (practice)

- UX/UI prototyping of a web application
- Creating websites in Wordpress
- Selection and configuration of appropriate wordpress plugins

Technologies: PHP, Wordpress, Figma, Adobe XD

Completed projects

HR Dashboard (Mentoring Reskilled - <https://reskilled.io/>)

- A platform for HR teams to collect data on candidates applying for specific positions.
- The project was written in TypeScript and the React framework, which uses hooks.
- The application has a full CRUD including JWT tokens and the API has documentation in Swagger.
- Tailwind was used for UI styling, Yup was used for form validation, React Hook Form was used for form handling, Axios and React Query were used for API communication.
- Additional GET Endpoint as JSON object was mockup in designer.mocky.io.
- Employee of month displayed through graphql-request and react-query libraries.
- Functionality has been tested using end-2-end tests in Cypress.
- The project was carried out under the guidance of a senior software engineer. I worked on multiple branches, the application was divided into tasks, which were subjected to senior code review.

Live track app (engineering project)

- An application for speditors, developed using firebase platform, google maps API, react framework and SCSS.

Expense tracker

- Application for expense tracker build in plain JavaScript and React using hooks(UseState, useContext, useReducer) and the context API.
