- REST API, GraphQL API
- End-to-end tests in Cypress
- Firebase, Chart.js
- Docker, CI/CD Pipelines (basics)
- NPM, Yarn, ESLint, Husky
- Figma, Adobe XD
- Scrum, Jira
- GIT

Languages

- Polish - native
- English - upper intermediate (B2)

Wojciech Jezierski

Junior Front-end developer

About me

Computer Science graduate with 6 months of commercial experience as (Junior) Front-end Developer. Proficient in implementation of HTML, CSS, and JavaScript, with an aim to transform design concepts into responsive and visually appealing websites and applications. Creative problem solver with a passion for creating user-friendly and engaging web interfaces. Excited about an opportunity to further develop in front-end or transfer my skills into the new role.

Work Experience

- Northvolt Systems Sp. z o.o.** **06.2022 - 10.2022**
Front-end developer (internship)
 - Developed front-end segments of the Manufacturing Execution System (MES) in the Vue.js library
 - Created reusable and responsive views for multiple systems
 - Presented data using a chart with the adoption of the Chart.js library and the Vue.js framework
 - Reporting in Jira
 - Cooperated within an international team in the Scrum methodology**Technologies: Vue.js, Chart.js, JavaScript, Tailwind CSS, HTML, CSS, Jira**
- SBKY** **05.2021 - 08.2021**
Front-end developer (practice)
 - UX/UI prototyping of a web application
 - Created websites in WordPress
 - Managed selection and configuration of appropriate WordPress plugins**Technologies: PHP, Wordpress, Figma, Adobe XD**

Completed projects

HR Dashboard (Mentoring Reskilled - <https://reskilled.io/>)

- This is an HR data collection/management platform which allows HR representatives to process job postings and applicants' data
- The project was written in TypeScript and the React framework, which uses hooks
- It has a full CRUD including JWT tokens and the API documentation in Swagger
- The following libraries were used: Tailwind - UI styling; Yup - form validation; React-hook-form - form handling; Axios and React-query - API communication
- Created additional GET Endpoint as JSON object functionality with mockup in designer.mocky.io
- Employee of the month functionality is displayed through GraphQL-request and React-query libraries
- Functionality has been tested using End-to-end tests in Cypress
- The project was carried out under the oversight of a senior software engineer and subsequent parts were subject to senior code review

Live track app (Engineering Thesis)

- This is an application for forwarders (logistics), developed using firebase platform, Google Maps API, React framework and SCSS

Expense tracker

- This is an application for expense tracking, written in plain JavaScript and React, using hooks (useState, useContext, useReducer) and the context API
